Rick, It's not like anyone here, at OAQPS or R7 has any experience with this, and there don't appear to be easy answers.

**Subject:** Remaining issues at Konza Prairie

In the call today with R7 and Kansas regarding the Konza Prairie site, I asked for one more week to resolve some remaining issues (the next call is scheduled for a week from Thursday). Please review the attached document, where I've tried to summarize what I see as the two major issues that will influence a decision about the site.

There are no easy answers here.
